Organizer

Harlem Biospace

Harlem Biospace (Hb) is a biotech incubator launched in 2013, the first of its kind in New York City, to offer affordable shared wet-lab space for early-stage biotech companies. It offers a beautiful wet lab outfitted with modern biotech equipment, exciting classes and events, and business support – creating a community to turn ideas into inventions that solve real health problems. Harlem Biospace is situated at the heart of three academic campuses (Columbia University, City College of New York, and Columbia's Manhattanville campus), with easy access to other major universities, the life science community, and the vibrancy of New York City.
